

To the nearest  
gram/mol, what is  
the molar mass of  
guanine?

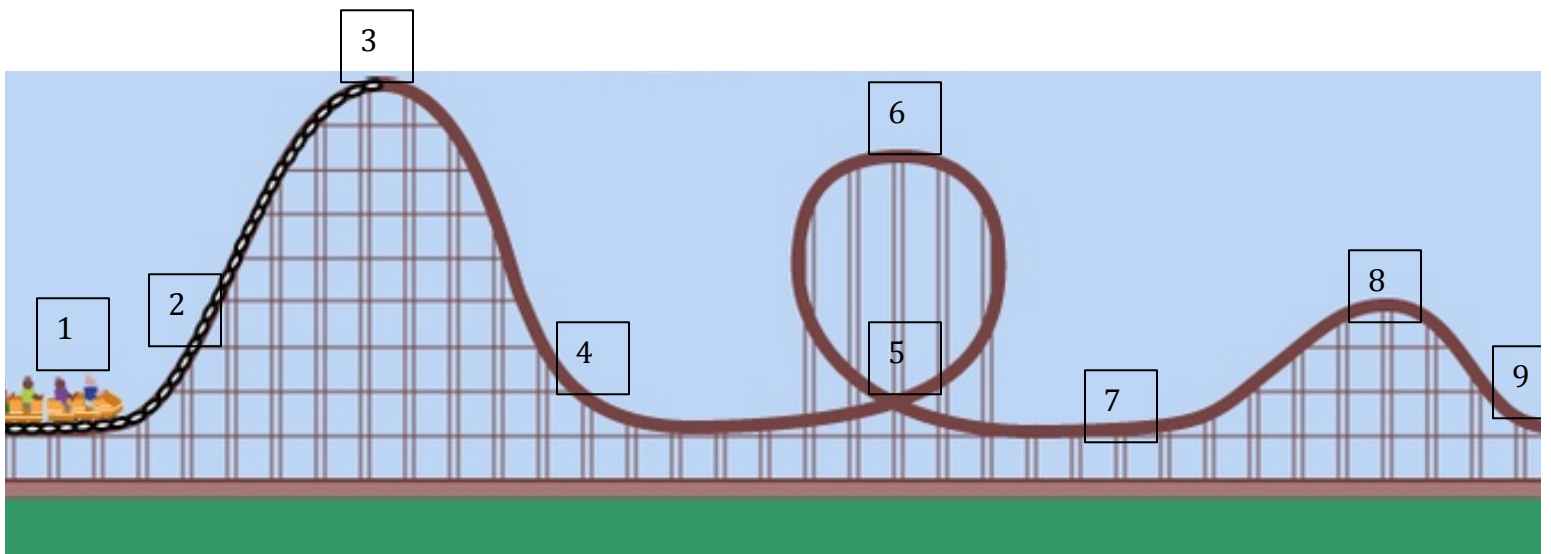

GUANINE

Put the stages of mitosis in order, starting with prophase.

Find the locations on the rollercoaster track with the greatest potential energy.

The secret code is in  
plain sight.

But you won't see it  
without this light.

Acids are red,  
Bases are blue,  
Find the right colors,  
And get the numbers too.

At first glance,  
They may look real.  
But with a closer look,  
The fakes will reveal.  
Three imposters in the room  
Are trying to hide.  
The code you will find  
Hidden inside.

First the Golgi Apparatus  
Then the Chloroplast  
Turn their letters into numbers  
Save the Nucleolus for last

Our volumes are about the same  
Or at least seem to be  
But the secret to this code  
Comes from each density

Find each of the gas giant planets,  
And get their AU's from the Sun.  
If you want to crack this code,  
Add to find their sum.
